TECH IDEA LTD.

THINKING OUTSIDE THE NETWORK

ABOUT US

Tech Idea encompasses a team of IT specialists who works towards overcoming newer challenges surfacing in the IT world. Our goal is to provide more than just tech-support; we aim to offer the finest consultancy and support available, to make the client's journey of seeking a solution smooth and hassle-free.

The team's years of experiences in solving business problems added with their determination to make an impact has caused the company to come a long way. Tech Idea is currently a leading independent, end-to-end IT services company, helping customers harness the power of innovation to thrive on change by offering valuable IT solutions to companies as well as individuals, without compromising in quality or efficiency.

Moreover, the team constantly works on maintaining and improving the performance of services provided. Long term support after deployment is offered to ensure client satisfaction and excellent quality product.
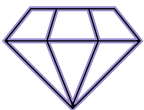

INTRODUCTION

MISSION

- Provide a solution that adds value to your business

- Turning your concept and vision into reality.

VISION

- Define, design, and deliver a solution with perfection

VALUES

- INTEGRITY: Know and do what is right

- RESPECT: Treat others the way you want to be treated

- RESPONSIBILITY: Embrace opportunities to contribute

Tech Idea has made its mark in the ICT industry with a team that is experienced and visionary. The innovative spirit on which the company was founded is the source of our overall strength. In the areas of web and software development, graphic design, and multimedia, we push the boundaries to discover new technologies and techniques.

Tech Idea offers a range of IT services including, but not limited to, software development, website development, technical consultation, graphic design and branding, etc. The services are tailored to individual client's business and personal needs.

The project managers walk the clients through the entire project's process to ensure mutual understanding. The client is consulted and involved throughout the entire design and development phases of the project to guarantee satisfaction and a final product that meets client requirements.

Thorough understanding of the business needs ensures a budget-friendly end-product that meets every deadline and the individual business needs.

As our clientele's needs change, we shall continue to expand business opportunities and develop new value-added services.

SERVICES

BUSINESS PRIORITIES

- Produce solutions that fits business needs to boost business growth

ADDED PRIORITIES

Develop, customize, migrate, and modernize custom applications for specific business needs such as data, workflows and infrastructure management, customer engagement, analytics, digital content, and e-commerce.

WEB SOLUTIONS

Design & Development of Websites, Client-focused, customer-centric, creating website solutions that deliver tangible business results, Tech Idea's web developers help brands the ever-changing digital landscape.

GRAPHICS DESIGN AND BRANDING

By using corporate branding with a successfully marketed service or product, a company can familiarize consumers with its products and may create brand loyalty. We approach problems and build brands from three different perspectives: what you don't know, what you think you know, and what you are willing to know.

TECHNOLOGY CONSULTING

To enforce your decision-making, Tech Idea delivers tailored consulting services, including technology and product road mapping, legacy audit, workflows formalization, programs for technology refreshment, and expansion.

QUALITY ASSURANCE

Tech Idea provides both during- development and independent QA consulting and testing services. Our experts adhere to Test Early and Often approach, while applying test automation practices for human effort reduction.

PRODUCT DEVELOPMENT

We assist you through the entire product lifecycle, from ideation to featuring on application stores and managing updates, addressing critical issues, such as idea feasibility, store compliance, monetization, and licensing.

OPERATIONS SUPPORT

To ensure the hassle-free and secure operation of your IT systems, we offer all-around maintenance, enhancement, and configuration services. We deploy stable solutions for 24/7 application monitoring and management.

OUR EXPERTISE

CLOUD SOLUTIONS

We create secure cloud solutions that help companies enhance productivity, speed, and scalability. Our developers offer cloud app development, cloud solutions, cloud infrastructure, and DevOps services, among other things. For customers in a variety of sectors, we have previously built private, public, and hybrid cloud infrastructures.

DEVOPS

Provide comprehensive DevOps services to help our clients respond to market demands quicker through continuous delivery. Our DevOps assists in the design and automation of server and network infrastructure monitoring and deployment while assuring its reliability and scalability.

ENTERPRISE CONTENT MANAGEMENT

Develop scalable and reliable document management solutions.

UI/UX

Our UI/UX designers build appealing and intuitive user interfaces to guarantee that your product not only looks good but also accomplishes its business objectives and offers a tailored consumer experience. We do user research, interaction design, prototyping, and user testing to provide an effective and usable UI/UX design that connects your consumers with technology and improves their experience.

ENTERPRISE MOBILITY

We assist our clients in automating processes, increasing company productivity, and lowering operational costs by providing effective and secure enterprise mobility solutions. For manufacturing and logistics firms, as well as hospitality enterprises, our engineers deliver end-to-end solution creation.
